Tianjin Jinglufa Amusement Equipment Co.,Ltd

company profile

>> Tianjin Jinglufa Tent Industry & Trade Co., Ltd. was established in 2000 with a registered capital of 20 million. It has two production areas and four subsidiaries in Beijing and Tianjin. The company's main products are high-end tents, water recreation facilities, large inflatable tents, construction tents, etc. It is the first domestic brand integrating design, production, processing, sales and after-sales service. The company covers an area of 35,000 square meters and has more than 300 employees.

>> Based on the tenet of "customer first, service first", Jinglufa uses the world's leading tent production concept and decades of production experience, and the tent is sold domestically. The company has the latest technology in the tent industry, passed the ISO9001:2008 international quality system certification, and in strict accordance with national safety standards, the use of high-strength aluminum alloy brackets and fire-retardant PVC tarpaulin, to create a safe and reliable series of tents. The structure of the tent is designed by unit combination, which has the characteristics of beautiful appearance, safety and stability, convenient disassembly and assembly, and small transportation volume. The span ranges from 3 meters to 60 meters, and the shape is shaped like a herringbone, a pointed shape, a round arch and a polygon.

>> For more than ten years, Jinglu has won high praise from customers for its high quality, high efficiency, safety, flexibility and diversified services. It always puts the consumer rights first, and the Jinglufa tent provides on-site installation services, lifetime free maintenance service, giving customers a safe, efficient and worry-free experience. Whatever your needs, Jinglufa always provides the perfect temporary space solution for your outdoor activities.

>>High quality fabric

The Tianjin Road awning room cloth is 850g/m², the thickness is 0.65mm, and 100% opaque. Add light-shielding coating, double-sided thickened acrylic surface treatment, self-cleaning mildew treatment (acrylic coating), anti-aging and anti-UV properties.

The tarpaulin has no fading after 4000 hours of xenon illumination, good softness, anti-ultraviolet, anti-aging, uniform coating, mildew, discoloration, and good self-cleaning performance. The tarpaulin will not change color or fade within 5 years. Meets German standard DIN4102 B1, M2, CFM/NFPA 701 fire protection standards. Has good flame retardant properties.

PVC knife scraping coated tarpaulin

>>Using high quality aluminum materials

The improvement of the tents of Jinglu Road is made of aluminum alloy profiles, which reduce the weight of the inclined beams under the condition of ensuring the strength. Not only the appearance is beautiful, but the aluminum alloy insert never rusts, and the degree of cooperation is very precise. High strength aluminum alloys have good tensile strength.

The hardness determines the service life of the aluminum alloy and affects the strength and stability of the tent structure. The wind-proof capacity of the tent is 100km/hr. It is calculated based on the aluminum of this hardness. The thickness of the oxide film determines the appearance of the aluminum and the surface corrosion resistance. Jinglufa provides aluminum in strict accordance with the standard film thickness $\geq 10\mu\text{m}$ - $15\mu\text{m}$ to ensure the service life of

Iso900: 2008 international quality system certification.

>>details decide the quality

Can your tent print a logo? (triangle cloth and vertical edge)

Yes, we can customize silk screen or inkjet logos and patterns according to your requirements, and charge the cost according to the complexity of the pattern.

Are your tents selling directly?

Yes, we assure you that all prices are based on ex-factory prices and no brokers make a profit.

Can your tent be rented?

Yes, we have 500,000 m² tents of various specifications for rent. Please consult the tent rental resources available to the salesman.

Can your tent be built over and over again? How long can it be used?

Our tents are easy to set up, disassemble and transport and can be used repeatedly. The tents are sold well in overseas and domestic markets. Under normal circumstances, the time can be 5-8, and the brackets can be as long as 15-20 years, depending on the degree of use.

Are you purchasing your products, materials and certificates?

Provide you with a full set of delivery materials, complete structural drawings, packing lists, installation manuals, and related certificates, and provide one-stop service according to your requirements.

The industrial tent side wall can be sandwiched with steel plate wall, which is modular in structure and can extend infinitely in length. Container trucks, forklifts and other machinery can easily enter and exit the warehouse tent from the electric shutter. The tarpaulin is made of flame-retardant double-sided PVC synthetic fiber cloth, which conforms to the European DIN4102 B1, M2 standard. It weighs 650-850 g/m² and is available in both shade and semi-transparent, and is resistant to wind, water, UV and flame retardant. The construction and disassembly cycle is short, the tarpaulin can be folded, and the frame is small after disassembly, which is convenient for transportation and storage.

>> American spire tent

The American spires are 33m, 44m, 55m and 66m in height and 2.5m in height. They are made of three-slot 65652.5 alloy pipe and have a wind speed of 80 km/h (wind load 0.3 kN/m²). The fabric is made of 850 grams of heavy-shield PVC fabric, and the apex is fixed to the four columns with a buckle lock. In addition to being used alone, it can be connected to a larger area with a gutter to create a unique shape that is more exciting in outdoor activities. American-style awning tents are easier to load and unload than European-style spires, with fewer components and easier storage. Two people can complete the entire tent installation in less than 10 minutes. In terms of structure, unlike the traditional European-style pointed roof tent, the internal structure is greatly simplified, and only two steel wire ropes and a central strut are used to support the roof. The appearance is elegant, the safety and stability are better than the folding tent, and it is very suitable for various outdoor activities.

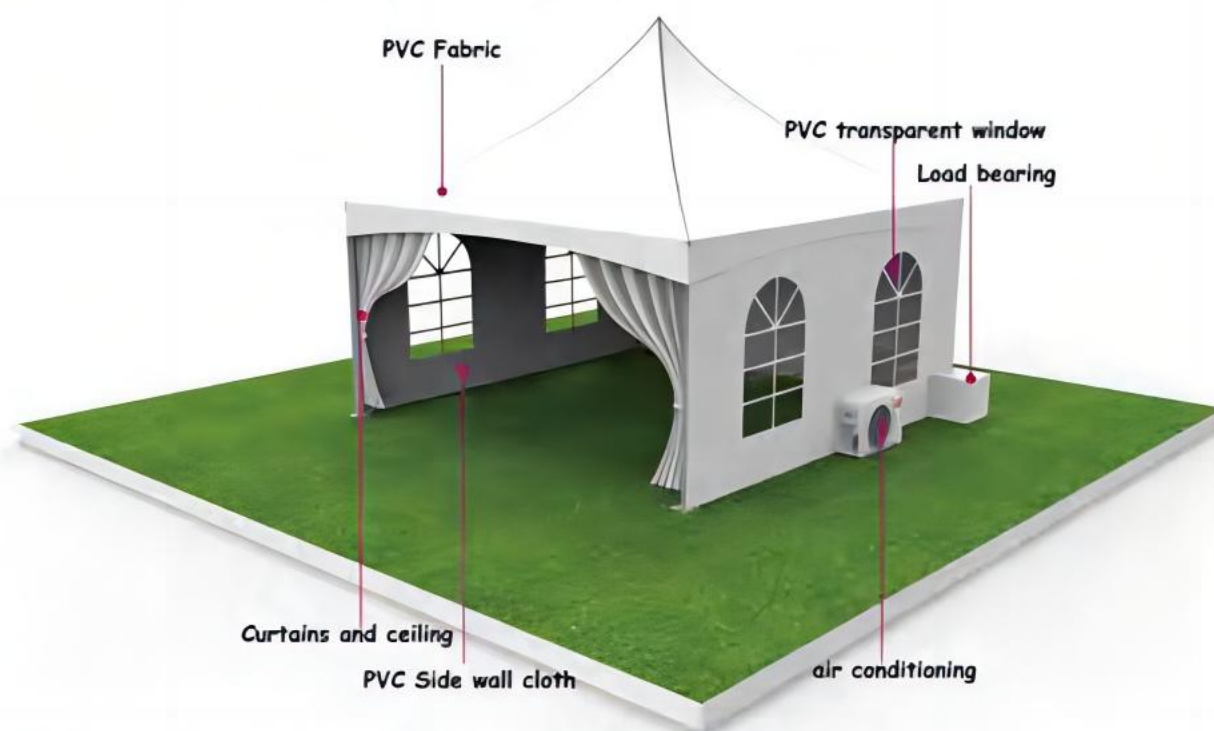

>> Features

- Easier to assemble and disassemble than traditional steeple tents
- Small parts, small size, easy to store
- No major mechanical assistance required
- High quality hot galvanized insert
- Beautiful and elegant, safe and stable than folding tents
- Single use can also be connected by drain groove Large area to form a special shape

>> Mini tent

The mini party tent is another innovation of Jinglu Road in a small span tent. The span size of the tent is 3m, 4m, 5m, 6m, 8m, the side height of the tent is 2.6m, the span is 3m, and the length direction can be increased by 3m, which can be extended indefinitely. The main section of the tent is 71x36x2.5mm, and the canopy is fixed by a tensioning rod. After the product is improved, the appearance of the tarpaulin top is more neat and tidy. At the same time, the tarpaulin top is better combined with the bracket and is more firm.

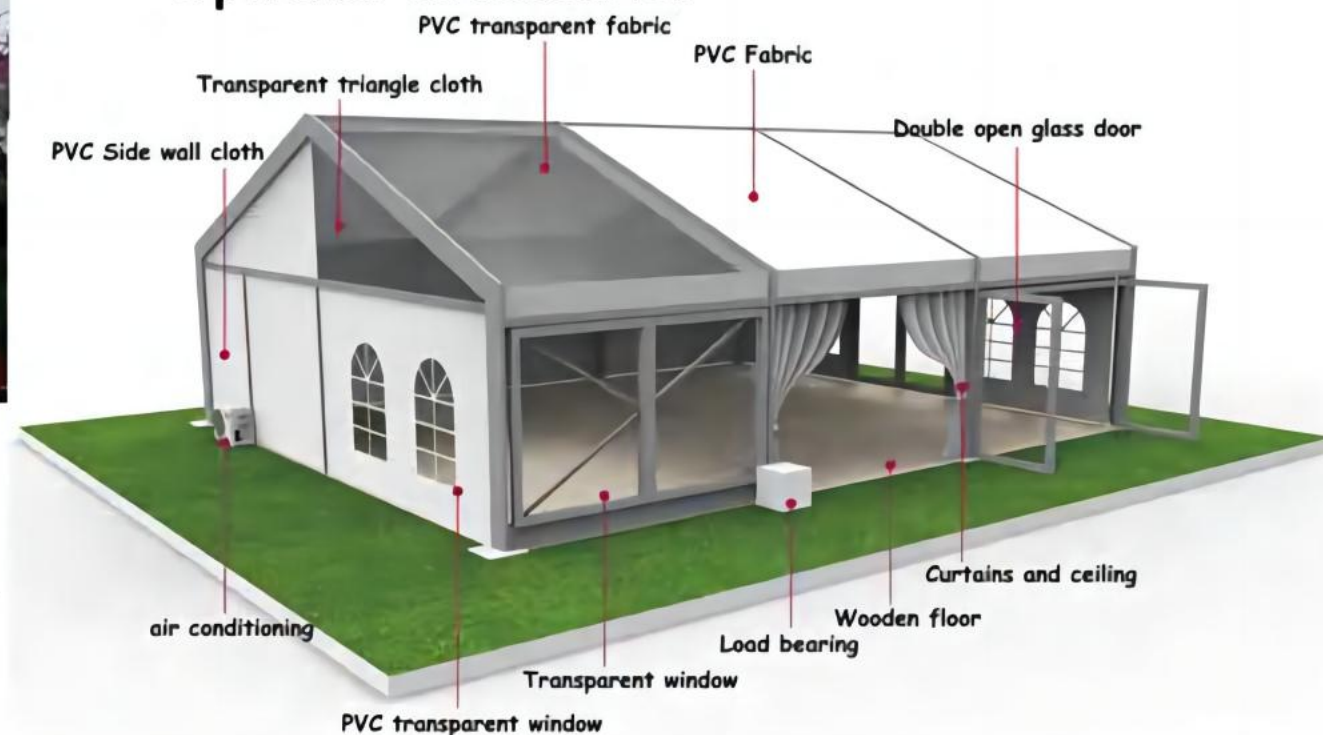

>> Features

- Short construction period, easy to assemble and disassemble
- Can be used as a temporary or permanent building
- Tension bar tarpaulin fixing system
- Easy to assemble and disassemble without forklifts and cranes
- Widely used in a variety of summer camp activities Trade show
- Various accessories are available

>> Warehouse tent

Jinglufa provides warehouse tents (rental/sales/tailor-made), whether you need permanent industrial application buildings or temporary buildings as your business grows, Jinglufa can provide you with the ideal solution. The convenience of our warehouse tents provides a flexible space for the company's off-season and flexible distribution of the site, avoiding the need for increased site leasing and off-site turnover due to production needs. The tent is far more economical and flexible than traditional steel structures and does not require a land permit. Maintenance is both simple and less costly due to less basic requirements and lower costs. The modular design of the warehouse tent building provides a good foundation for the integration of the warehouse tent.

>> Features

Modular design, unlimited length, can be customized

Advanced design, easy access to trucks and forklifts

Completely equipped with lighting, lightning and drainage Lightning protection, collision avoidance system

The tent construction period is short it can be repeatedly disassembled and assembled, and the transportation is convenient.

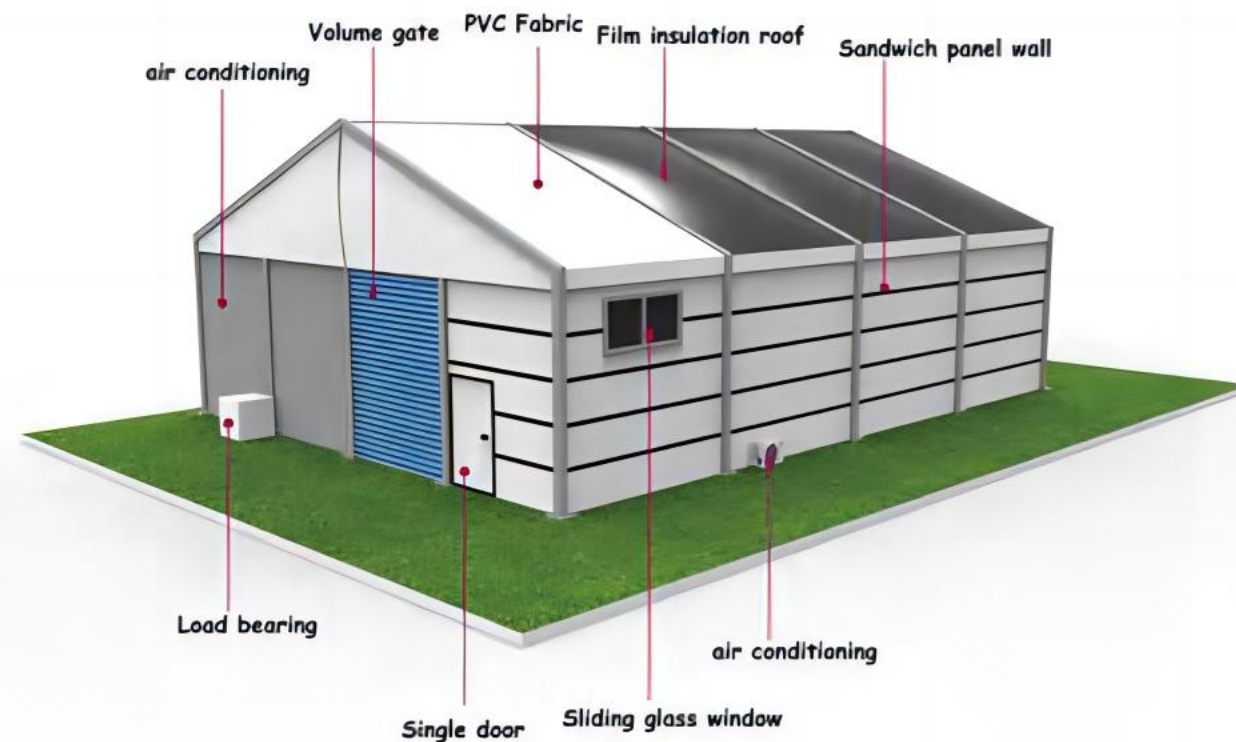

Widely used, can be used as temporary warehouse, temporary workshop Temporary factory building, temporary office, etc.
